

CRYPTO OTC ROOM • INTERFACE OVERVIEW

Settlement Dashboard

Track HTLC settlement progress and manage on-chain operations across multiple chains.

BUILT ON BITCOIN • ETHEREUM • BASE • ROBINHOOD CHAIN • TRON • SOLANA

DUAL-HTLC

LIVE ON MAINNET

Open Live Settlement • internal endpoint, shared under NDA

For the interface designs themselves, see [Product Design Preview](#).

Settlement Pipeline

Progress Tracker

The swap statuses the API reports: Proposed → Accepted → ETH Locked → ETH+BTC Locked → Completed. Real-time status with green checkmarks for completed stages.

HTLC Contract Details

Initiator and Counterparty HTLC panels showing contract address, timelock countdown (23:41:12), PENDING/LOCKED status, and blockchain explorer links.

Multi-Chain Support

Settlement across Bitcoin, Ethereum, Base, Robinhood Chain, Tron and Solana chains. Connected wallet status, chain selector, and cross-chain hash coordination.

Trade Card

Full trade details: BTC/USDT SELL 0.01 BTC @ 70,296.00 USDT with the escrow contract address and an ACCEPTED status badge.

Dashboard Features

Active / Completed / Refunded

Tab-based filtering for settlement status. Track live settlements, review completed trades, and monitor refunded/expired contracts.

AI Agent Section

Sidebar includes AI Agent Dashboard and Inventory management. The hosted MCP server returns unsigned transactions for the user to sign; only the local MCP server, which holds keys itself, can settle autonomously.

Full Navigation

Portfolio, Announce, Trades, Settlement, Messages, Wallets, Directory, Rewards, Operations.

E2E Encryption

All communications end-to-end encrypted. Footer shows: CONNECTED Mainnet, E2EE, 6 CHAINS, HTLC v1.
